Setting Up the NebulaGameX Console: Complete User Guide

(This guide follows documentation best practices and includes clean mock-up screenshots.)

Overview

The **NebulaGameX Console** is a next-generation gaming system designed for home entertainment. This guide walks you through unboxing, connecting, and configuring the console.

What's Included in the Box

- NebulaGameX Console
- Wireless Controller
- HDMI 2.1 Cable
- Power Adapter
- Quick-Start Card

Mock Screenshot:

+------------------------------------+
```

Step 1: Connect the Console to Your TV

1. Locate the HDMI port on the back of the NebulaGameX.
2. Plug one end of the HDMI cable into the console.
3. Connect the other end to an open HDMI port on your TV.
4. Ensure the cable is firmly seated.

```
TV (Back Panel)
[ HDMI 1 ] [ HDMI 2 ] [ HDMI 3 ]
        ^-- Plug cable here
```

Step 2: Power the Console

1. Plug the power adapter into the console's power port.
2. Plug the power adapter into a wall outlet or surge protector.
3. Press the power button on the front of the console.

Tip: A blue light indicates the console is powered on.

Step 3: Pair the Controller

1. Hold the **Sync** button on the controller for 3 seconds.
2. The console automatically detects and pairs with the controller.
3. When paired, the controller LED will stop blinking.

Mock Screenshot:

```
[Controller]
   ( ) Sync Button
  [LED]  blinking...
```

Step 4: Initial Software Setup

1. Select your language.
2. Connect to Wi-Fi.
3. Sign in or create a Nebula Online account.
4. Install available system updates.

Mock Screenshot:

```
+------------------------------+
|  Select Language:            |
|  > English                   |
|    Español                   |
|    Français                  |
+------------------------------+
```

Step 5: Insert or Download Games

- To install a physical game: insert the game card into the top slot.
- To download a digital game:

- Open the Nebula Store.
- Search for the game.
- Select **Download**.

Troubleshooting

- **No picture on TV** → Ensure correct HDMI input is selected.
- **Controller not pairing** → Hold Sync for 10 seconds, restart console.
- **Wi-Fi issues** → Move closer to router or reboot network.

You're Ready to Play!

Your NebulaGameX Console is now fully set up. Enjoy gaming!
