The HTML version provides enhanced accessibility features including keyboard navigation, screen reader support, responsive design, dark mode support, and high contrast options.

Objectives:

- Learn about table joins and table relationships

Complete the following problems

References, a video, a PowerPoint and some notes are available at my website

Link: <https://www.aholdengouveia.name/AdvData/sqlpt2.html>

The tutorial you'll be using is at Link: <https://sqlbolt.com/> The challenges are at Link: <https://www.hackerrank.com/domains/sql?filters%5Bsubdomains%5D%5B%5D=join&filters%5Bsubdomains%5D%5B%5D=advanced-join>

Both are free, but HackerRank needs you to register so you'll have a profile to save your work.

1. From Link: <https://sqlbolt.com/> go through the sections on Table joins and nulls, Sections 6-8. Take screenshots of each challenge at

the end after you complete it, making sure each problem has a green checkmark.

2. From Link: <https://www.hackerrank.com/domains/sql?filters%5Bsubdomains%5D%5B%5D=join&filters%5Bsubdomains%5D%5B%5D=advanced-join> You'll be doing 5 challenges that include table joins. You can sort by simple and more advanced joins. Take screenshots of each solution making sure to include your name and the term in each screenshot.
3. Each screenshot from both websites should include a short explanation of how you solved it, and what resources you used. If you needed hints, include that and where you found the hint.
4. Screenshot of your HackerRank profile that includes the completed challenges.

Deliverables

- Document that includes each screenshot with explanations.
