Accessibility Notice

This document is also available in HTML format at:

Link: <https://aholdengouveia.name/IntroData/labs/datasecurity.html>

The HTML version provides enhanced accessibility features including keyboard navigation, screen reader support, responsive design, dark mode support, and high contrast options.

Objectives:

- Upon completion of this lab, students will be able to identify some examples of how healthcare data is used and shared, where some vulnerabilities are, and some common paths of Data through the system.
- Students will also be able to identify some of their personal information, including what is publicly available, and how to starting protecting their data and themselves.

Complete the following problems

References, a video, a PowerPoint and some notes are available at my website
Link: <https://www.aholdengouveia.name/IntroData/datasecurity.htm>

Disclaimer: You do not need to share personal information for this lab. You can choose to share or not share personal information. When questions are asked that are too personal for you, you can choose to generalize your answers or blur out any screenshots that contain personal information you do not wish to share.

Personal Data

1. Go to Link: <https://aboutmyinfo.org/identity> and see how unique your data is.
2. How unique are you?
3. Are you easy to identify? Take a screenshot.
4. What other information do you think might be available about you? Try Googling yourself to see what pops up, any examples?
5. Go to Link: <https://haveibeenpwned.com/> and pick something to check. Have you been pwned? In which breach?
6. Go to Link: <https://robinlinus.github.io/socialmedia-leak/> what social media are you logged in to? Did you realize you were logged in to each of them? Do you know how to logout of each?
7. Go to Link: <https://webkay.robinlinus.com/> what about your browser? Did you realize how much information you were sharing? Any of them surprising? if yes, Which ones?

How to protect your data

1. Go to Link: <https://www.consumerreports.org/electronics-computers/privacy/66-ways-to-protect-your-privacy-right-now-a7383217267/> and pick 3 things to try out right now to help protect your privacy. What did you pick? Why?
2. Pick one from the above article and share with someone in your life. What did you pick? Who did you share it with? Why?

Deliverables

1. All the answers to the Personal Data questions
2. Your answers on how to protect your data.
