The HTML version provides enhanced accessibility features including keyboard navigation, screen reader support, responsive design, dark mode support, and high contrast options.

Learning Outcomes

By the end of this lab, you will be able to:

- Explain the history and significance of Linux in modern computing
- Take notes on a technical article using the sketchnotes format
- Summarize technical content in your own words

Lab Instructions

Read one of the following three articles and turn in sketchnotes as described below. It is very important that it is in your own words. Do not copy, plagiarize or slightly reword someone else's text.

You will be trying something called Sketchnotes. There is more information here: Link: `https://rohdesign.com/sketchnotes`

For this lab you will read one of the articles and then make a page or less of notes, using the sketchnotes format, and turn in a picture of your notes. Make sure your picture is clear. Any paper and pen is fine, but make sure it's legible.

Article options:

1. Linux Took Over the Web. Now, It's Taking Over the World Link: `https://www.wired.com/2016/08/linux-took-web-now-taking-world/`
2. Why Linux is the most important software project in history Link: `https://felipec.wordpress.com/2011/03/06/why-linux-is-the-most-important-software-project-in-history/`
3. Linux turns 33 in 2024 Link: `https://www.networkworld.com/article/1286507/linux-turns-33-in-2024.html`

Deliverables

Picture of your sketchnotes about the article you picked. Make sure somewhere on your notes you have your name and which article you picked.
